Praemonenda I

Huius libri conficiendi cur ceperim consilium alio loco (Gradenwitz, Einführung in die Papyruskunde pagina X) dixi. Ibidem relatum Hermanno Diels id deberi, quod voces a tergo non secundum syllabas sed secundum litteras disposui.

Operi initium fuit annus 1898 quo ex Georgesii Wölfflinii Pauckeri copiis voces singulae in schedas redactae sunt: cui rei operam dederunt stud. phil. Wiemer (qui tamquam praeerat operi) et alii studiosi theol. iur. phil. Tum voces a fronte ordinatae prelo sunt traditae curante Dr. phil. Lehnert. His confectis iamque a tergo schedis ordinatis altera pars operis per quattuor annos typographos exercebat: id eo factum est quod Dr. Lehnert ad Thesaurum linguae Latinae evocato in eius locum primo stud. (iam Dr. phil.) Bruno A. Müller successit deinde post varios casus Dr. Lommatzsch quorum illi vocabula a tergo ordinanda, hic plagulas examinandas suscepit.

Per totum autem opus Augustus Brinkmann tantam partem laboris sibi imposuit, ut quae bene administrata sunt in his indicibus, eorum partem permagnam illi deberi quin grato animo confitear facere non possim.

Otto Gradenwitz.

Praemonenda II

Pro fundamento usi sumus Georgesii vocabulario septimum edito a. 1879, nisi quod errores aliquot apertissimos correximus et plane inutilia abiecimus, ita tamen ut etiam perdubia retineremus quae quamvis superflua nocere non viderentur. Quo fit ut nec formae singulares vel memorabiles prorsus evitatae sint nec vocum minus mobilium ubique extet nominativus singularis vel praesentis prima persona, sed ubi Georgesio placuit etiam apud nos vel pluralis vel tertia persona inveniatur, exceptis glossematicis: velut si quis nomina in -a, -io, -or exeuntia omnia colligere volet, ei etiam -ae, -iones, -ores perlustranda erunt. Eandem ob causam Graecae originis nomina partim sub os, -on, partim sub -us, -um locum habent.

Georgesii copias supplevimus ex Pauckeri variis collectaneis eisque quae in Wölfflinii Archio inveniuntur lexicis addenda. Quae a Georgesio absunt asterisco (*) notavimus.

In posteriore operis parte brevitatis studio adducti eiusdem vocis duplices formae ubi vel nulla alia voce vel perpaucis interpositis altera alteram secuturae erant (velut *sapphiratus miratus sappiratus*), uberiorem dedimus priore loco, litteris quae alteri formae desunt, uncis quadratis inclusis (*sapp[h]iratus miratus).*

Terminationes ambiguas -o, -or, -us quia evidens utilitas poscere videbatur ita distinximus ut verba numeris coniugationum additis a substantivis et adverbiis dirimeremus, a secundae declinationis substantivis et adiectivis tertiae et quartae substantiva numeris, adverbia ut flexione carentia adiuncto °signo separaremus.

Vocum quasi memorias delineare nostrum non duximus. Neque enim huic operi id propositum erat ut scientia vocum Latinarum augeretur, sed ut ex eis quae praesto erant pararetur instrumentum utile vel necessarium iis qui grammaticis et criticis studiis litteras aucturi sunt; id speramus Thesauro linguae Latinae ad finem perducto exstiturum nobis Hommeliis Lenelium.

Otto Gradenwitz. Augustus Brinkmann.
